HEALTH RESEARCH INSTITUTE™

Translational Research Centre

Translational Research Support for Children's Health

Children's Health Research Institute in London, part of the Lawson Health Research Institute and one of the largest children's research institutes in Canada, has created a Translational Research Centre. This centre will help shorten the time frames from scientific discovery to direct application on specific clinical problems. The primary focus is on children's health research.

Resources provided include:

Bench-to-Bedside research opportunities

Facilitated access to high quality tissue samples.

Dedicated equipment and research personnel

Specialized equipment and trained research nurses and technicians, as well as on-going support from CHRI scientists.

High quality tissue samples

Standardized acquisition, categorization and processing procedures of tissue samples.

Secure storage, web access and back-up

Hard wired, kept at (-) 80 degrees, with 24 hour alarmed security. Password protected web access to clinical information data bases for linkage.

Biohazard laboratory

Level 2 containment laboratory within Children's Health Research Institute.

Bioethics support

Full support for bioethics application submission.

Flexible service packages

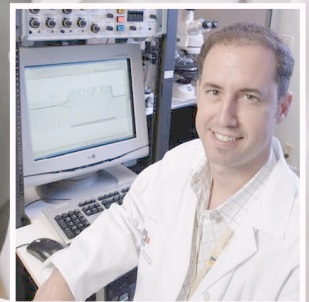

Individualized packages particular to your research needs. All packages include bioethics application support.

Strategic links with other research centres

Vibrant base of interconnected core research facilities in London for genomic and protein analysis.

Applications are now being accepted for child health research projects.

For quality assurance and effective use of support, applications will be reviewed by the Translational Research Centre Operations Committee. For more information email trcchri@lawsonresearch.com.

Dr. Doug Fraser, Director of the Translational Research Centre, scientist at Children's Health Research Institute and clinician at Children's Hospital, London Health Sciences Centre

Translational Research Centre Operations Committee includes:

William Avison, PhD

Craig Campbell, MD, MSc, FRCPC

Douglas Fraser, MD, PhD, FRCPC

Victor Han, MD, FRCPC, FRCP

Claudio Martin, MSc, MD, FRCPC

Doreen Matsui, MD, FRCPC

Chris Pin, PhD

Michael Rieder, MD, PhD, FRCPC, FAAP, FRCP (Glasgow)

Tony Rupar, PhD, FCCMG

The **Children's Health Research Institute** is a part of the Lawson Health Research Institute, the research institute of London Health Sciences Centre and St. Joseph's Health Care, London and is affiliated with the Schulich School of Medicine & Dentistry, The University of Western Ontario.

Children's Health Foundation raises and grants funds for specialized health care, equipment, programs and training at Children's Hospital, London Health Sciences Centre, and childhood research at the Children's Health Research Institute.
